I have tried testing on 2 servers (I am in the US but I am also getting this error on my Canadian server). The server on which I am getting the issue is a Windows Server 2008 R2, using PHP 5.4.6 and cURL 7.19.7. I also just tried on my home Windows 7 PC with PHP 5.3.27. From my testing, I cannot get cURL to work with my Windows Server 2008 R2. It works fine with my PC, but on the Server, whenever I use cURL, it always fails. More details: With the server, I am getting the following error whenever I try to use cURL: PHP
